## D800sp - Single Line Analog Speakerphone Deskset Telephone

The D800 Series phones are Inn-Phone®'s newest addition to its hospitality analog room telephone product line. The D800 Series product line features a single line analog room telephone with a contemporary design that compliments the latest trends in hotel room designs. The D800 Series is available in three configurations: D800 basic, D800SP with a speakerphone option and the D803SP which provides a speakerphone and three programmable service buttons.

Utilizing the field proven and industry respected audio electronics and Heavy Base design features of previous generation Inn-Phone products, the design of D800 Series helps minimize breakage as compared with other room phones. The Heavy Base extends product life, minimizes potential for damage caused by phones that are more easily dragged from night stands or desks and helps control expense for room phone maintenance.

The D800 Series offers the reliability and durability of all Inn-Phone room telephone offerings with a sleek modern design, easy to use dial pad and enhanced face plate layout area. Customized face plates are available for all three D800 Series products.

The D800 Series provides a reliable, sophisticated, upscale room telephone design at very affordable pricing. Contact Inn-Phone for a free sample or quote today!

### FEATURES

- Built in CLEARING AID ® circuitry automatically adjusts frequency response for improved clarity. This is an aid to 70% of guests with high-frequency hearing loss.
- Dual Tone, Deep Pitch IC Ringer
- FCC / ETL / UL / CE approved
- Full Range Volume Control (maximum amplification as allowed by law)
- 7' Handset Cord / 20' Line Cord (Fully Modular)
- Compatible With AC And DC Neon And Some LED Systems
- Extra Large Customizable Faceplate
- Extra Large Super Bright Ring/Message Waiting Indicator
- Flash Button
- Free Customized Inserts Available
- Hearing Aid Compatible
- High Luster, Euro Style, Rugged ABS cabinet with High Durability Components
- Outstanding audio amplification quality
- Wall Mountable
- Easy Access Dataport
- Extra Heavy, Non-Slip Base provides a solid look and feel

The TL-IP from Inn-Phone is an industry first!! The TL-IP is the first SIP enabled product in a compact trim line design. The familiar packaging provides users with a simple to use device without the confusing and overwhelming number of options and functions that dominate most IP telephone designs

The TL-IP comes with Inn-Phone's unique Heavy Base electronics enclosure. The Heavy Base design helps minimize breakage as compared with lighter phones that can more easily be dragged from desks and workspaces resulting in breakage and more frequent replacement.

The TL-IP, like all Inn-Phone hotel products, comes with free customized face plates (minimum order applies) and face plates can typically be completed and shipped in less than 24 hours after design approval. The TL-IP meets hospitality room telephone standards and exceeds ADA requirements for volume boost.

Available in black or cream, the TL-IP can be used in desk top or wall mount applications. The TL-IP is the ideal choice for an economical IP solution that is easy to use and configure, yet provides Inn-Phone's trade mark reliability as a courtesy phone or service phone for hotel guests and staff.

Contact Inn-Phone or an Authorized Dealer today for a quote!
